

## MAVA - Summer 2020 Course Descriptions

### ***Advanced Google Tools via Google Classroom - Cohort #3***

*4pm to 5:30pm*

*August 24th, 26th, 28th and 31st*

- *6 hours of synchronous instruction via Zoom*
- *4 hours of independent work time before and between class sessions*
- *Four hour log will be due August 31st*

*Target audience: This course is designed for participants who are experienced and comfortable using basic Google tools such as Google Drive, Docs, Slides, Sheets, and Google Classroom. Participants who take the Beginner Google course might also find this course beneficial. They should already have experience using Google Classroom (even if this experience is basic/introductory, including as part of the Beginner Google Course) and have a desire to expand their knowledge of the advanced features and capabilities of a variety of Google tools.*

Are you a current Google and/or Google Classroom user? Do you use Drive to create and/or house your materials? Do you sometimes see really “cool” tech use by other teachers and wonder how it’s done? Maybe you just want to use technology to make your life easier? If you’ve got some Google experience and you’d like to kick it up a notch, join this learn-by-doing PD and prepare your Google usage and Google Classroom for fall, no matter what the model of instruction may be. *Upon completion of this course, participants will have many new tech tools and strategies added to their instructional strategies “goodie bag”.*
