

MAVA - Summer 2020 Course Descriptions  
Technological Tools to Enhance Live Sessions for Beginners

***Technological Tools to Enhance Live Sessions for Beginners (10 PD Course)***

*Dates: July 28, 29 and 30th (Tuesday, Wednesday, and Thursday), 9am-12:15pm*

*Target audience: This course is designed for participants who are just starting their journey with online instruction and have little or no experience with setting up online meetings, creating or using screencasts, or engaging students in live instruction. If you've never tried or have stumbled through these elements, this beginner's class is for you.*

***Description:***

This professional development opportunity will introduce participants to some technological tools and platforms that enable live sessions along with the basics of screencasting and using videos for delivering direct instruction. Once the basics are covered, the PD will focus on grouping students, and encouraging student engagement using these entry-level features.
